

PRODUCT SPECIFICATION SHEET

LOCKING FILLER CAP

BRAND:

TOP SPEC:

Made In
Britain

PAGE

1/1

Product Description

Locking cap for an oil storage tank filler point.

The bottom threaded ring goes over the 2" threaded outlet on your tank and is then secured by the brass shear screw.

The top cap then lines up with the elbow locking tab and is secured further by a padlock (not supplied).

Main Features

- British made valve reducing stock availability issues
- 2" threaded outlet

Fitting

Screw on the locking ring first, Do not tighten the shear screw until you have then screwed on the cap and lined up the elbow locking tab, fit your padlock, then tighten the brass shear screw to until the head breaks off to secure the locking ring in place.

Additional Information

Locking Filler Cap

Part Number

AFC1000-L
