

PRODUCT SPECIFICATION SHEET

BUND ALARM FOR TANKS

BRAND:

Atkinson
EQUIPMENT LTD

TOP SPEC:

PAGE

Battery or Mains Powered 1/1

Product Description

Atkinson Tank Bund Alarm

Battery or mains powered versions available.

Simple operating principle; A float switch is suspended inside the bund. This is factory attached to the alarm with a cable of 2m in length. In the event of the bund starting to fill with fluid, when the float is raised by the fluid this will cause an audible alarm to sound. The alarm can be silenced whilst the offending rise in liquid is being investigated and corrected.

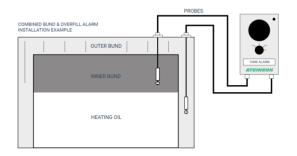

Main Features

- O Be alerted in the event of a breached bund
- O Simple to use

- O Battery or mains powered versions available
- O Extendable probe cables
