### Product Description

#### FMT PORTABLE FUEL TRANSFER KIT - 12V, 110V OR 230V

Designed by Atkinson Equipment, this FMT Portable Fuel Transfer Kit is designed as a ready to use portable refuelling pump solution for diesel dispensing from drums or small tanks to refuel vehicles. In some applications like constructions sites, agriculture or boats, a battery powered pump is the only option.

This kit has a choice of voltages to suit your application.

The German manufactured FMT pumps have very small tolerances which provide for a most efficient suction and delivery performance.

### Main Features

- Ready and easy to use portable refuelling kit
- Various pump voltages to suit your application
- Includes 4.6m of 3/4" hose
- Manual nozzle

### What's Included?

- FMT Pump (voltage of choice)
- 4.6M 3/4" single piece of hose so that the choice of the length of the supply and delivery on each side of the pump is left up to you. Cut according to your own application.
- Manual Nozzle - 60lpm
- All fittings included: swivel, integral bypass, non-return valve, strainer, jubilee clips, hose tails & PTFE tape

### Pump Voltages

- 12v DC - 35lpm (Battery with Crocodile Clips)
- 110v - 60lpm (Mains)
- 230v - 60lpm (Mains)
- 230v - 100lpm (Mains)

### Note

The 12v pump comes complete with 1" Male x 3/4" Male Hex Nipples in the inlet/outlet ports as standard (these are discarded in order to fit the supplied hose kit).

### Additional Information

12v DC - 35lpm Battery Powered Portable Pump Kit

110v - 60lpm Mains Portable Pump Kit

230v - 60lpm Mains Portable Pump Kit

230v - 100lpm Mains Portable Pump Kit

### Part Number

P-23-012-KIT

P-23-430-006-KIT

P-23-034-KIT

P-23-036-KIT
